

PROJECT PLAN · PREPARED FOR THE CLIENT

RSSkyler Limo Website

Everything required to build, launch and run the site — what we need from you, what has to be purchased, and how it gets deployed.

Prepared 9 September 2026

Domain rsskylerlimo.com

Stack Next.js · Express · MySQL

What is being built

A marketing and booking website for an NYC chauffeur service — built to generate calls, quote requests and online bookings, not just to look good.

The site is roughly eighteen public pages, an online booking and quote system, an admin dashboard for managing incoming requests, and the email pipeline that connects them. It runs on a single server that we manage.

Three things are needed to finish it. The first is the one that holds everything else up.

Information from you

Real business details, confirmation of which services you genuinely offer, your coverage area, and the fixed airport rate card. Pages cannot be written against placeholders.

Photography

Photographs of your actual vehicles and chauffeurs. The longest lead time on the project — worth arranging this week.

Accounts and hosting

A server, a mailbox and a handful of free service accounts, listed with costs further down. All registered in your name.

What we need from you

Nothing below is optional. The site cannot legitimately launch with placeholder details, and several items have long lead times — **photography especially**. Please treat this as the critical path.

BLOCKING · NEEDED FIRST

The phone number currently on the site is a placeholder. Every page, the header, the footer and the tracking page use a fake number. We need the real dispatch line before anything goes live, and it must match your Google Business Profile character for character.

Business details

- ☐ Dispatch phone number, exactly as it should be displayed
- ☐ Whether that number receives and **text** — we only add a "Text Us" button if is monitored for **messages** someone actually replies
- ☐ Email addresses to publish, and where booking notifications should land
- ☐ Business address, or confirmation that you operate as a service-area business with no public address
- ☐ Actual operating hours — we can only claim 24/7 if dispatch is genuinely reachable at 3 a.m.
- ☐ Registered legal entity name, for the Terms and Privacy Policy
- ☐ TLC, DOT or insurance credentials you want displayed, with numbers

Services — confirm what you actually provide

We will remove anything you do not confirm. Advertising a service you do not offer creates complaints and chargebacks.

SERVICE	QUESTION TO CONFIRM
Flight tracking	Do you actively monitor flights and adjust pickups automatically, or does the client call you?
Meet & greet	Does the chauffeur come inside to arrivals with a name board, or wait curbside?
Child seats	Available on request? Which types, and is there a fee?
Luggage assistance	Standard on every trip?
Corporate accounts	Do you offer monthly invoicing and written service levels today?
Hourly charters	Minimum booking length?
Cruise terminals	Do you serve Brooklyn and Manhattan cruise terminals?
Group / roadshow	Offered, or out of scope?
Wedding coordinator	Is an on-site coordinator genuinely included in the higher packages?

Coverage

- ☐ Confirm airports served: JFK, LaGuardia, Newark, Westchester (HPN), Teterboro
- ☐ Confirm areas served beyond the five boroughs — New Jersey, Connecticut, Westchester
- ☐ Neighbourhood-level areas you genuinely cover, for the Service Areas page

Pricing

- ☐ **Fixed airport rate card** — a price for each airport, for each vehicle class
- ☐ Confirm what those fixed prices include: tolls, gratuity, waiting time, parking
- ☐ Hourly rates and minimums

- ☐ Cancellation, deposit and waiting-time policies, for the Terms page

Fleet

- ☐ Actual vehicles: make, model and year for each class
- ☐ True passenger and luggage capacity per vehicle
- ☐ Features worth listing — leather, climate zones, bottled water, phone chargers, privacy partition

Photography

LONGEST LEAD TIME — START THIS NOW

The fleet page and homepage need photographs of **your actual vehicles**, not stock images. A vehicle photo that does not represent the car that arrives is a direct trust problem, and the brand guidelines rule it out explicitly.

- ☐ Exterior shots of each vehicle class, on recognisable New York streets
- ☐ Interior shots where possible
- ☐ A chauffeur at work — opening a door, loading luggage — with that person's written permission to use their image
- ☐ Shoot at golden hour or blue hour

Accounts & access

- ☐ Google Business Profile — ownership confirmed and access granted to us
- ☐ Genuine Google reviews we may display, and the profile link for "Leave a Review"
- ☐ Social media accounts that actually belong to the business
- ☐ Any existing analytics, ad accounts or booking software currently in use
- ☐ Namecheap account access, or confirmation you will make the purchases yourself

Accounts and services to purchase

Prices are approximate and should be verified at checkout — Namecheap's promotional first-year pricing differs from renewal pricing. Everything marked free stays free at this site's expected traffic.

Year one, all providers

ITEM	PROVIDER	PURPOSE	OWNER	YEAR 1
Domain	Namecheap	rsskylerlimo.com — already owned	HAVE	\$15
VPS — 4 vCPU / 6 GB	Namecheap	Runs the site, the API and the database	CLIENT	\$290
Mailbox	Namecheap Private Email	Human inbox for reservations@	CLIENT	\$15
Off-server backups	Namecheap add-on or Cloudflare R2	Nightly database and file backups	CLIENT	\$0–60
DNS, CDN, firewall, SSL	Cloudflare	Speed, HTTPS, DDoS and bot protection	DEV	\$0
Transactional email	Resend	Booking and quote confirmations	CLIENT	\$0
Maps & addresses	Google Maps Platform	Address autocomplete, distance for quotes	CLIENT	\$0–300
Analytics	Google Analytics 4 & Search Console	Traffic and conversion tracking	DEV	\$0
Spam protection	Cloudflare Turnstile	Stops bot form submissions	DEV	\$0
Monitoring	Sentry & UptimeRobot	Error and downtime alerts	DEV	\$0
Estimated year one				\$320–680

DO NOT BUY

Shared hosting or EasyWP — cannot run this application. **A paid SSL certificate** — Cloudflare and Let's Encrypt provide free, auto-renewing certificates. **PremiumDNS** — Cloudflare's free DNS is better. **A cPanel licence** — see the note below; it is the single most expensive unnecessary add-on.

ARCHITECTURE

How it is put together

One server runs everything. Cloudflare sits in front of it, absorbing traffic spikes and serving cached pages close to the visitor.

Cloudflare DNS · CDN · HTTPS · firewall · bot protection — free plan

Nginx Routes requests, terminates TLS, serves images and static files

Next.js — port 3000 The public website: every page a customer sees

Express API — port 4000 Booking and quote submissions, email dispatch, admin dashboard

MySQL — local only Bookings, quote requests, customers — not reachable from the internet

CORRECTION · CPANEL IS NOT INCLUDED

A Namecheap VPS ships as a bare Linux server. **cPanel is a separate paid licence**, roughly \$15–45 per month depending on tier, and it is not needed here. MySQL installs directly on the server in about ten minutes and costs nothing. If you want a visual way to browse the database, we will set up a free admin tool over a secure connection instead.

Pages the site will include

The right-hand column is what each page is waiting on from you. Where it is blank, we have what we need.

URL	PURPOSE	WAITING ON YOU FOR
/	Hero, booking widget, services, airports, fleet, trust, areas, reviews, FAQ, final call to action	Phone number, photos, reviews
/services	All services in one place, each linking to detail	Confirmed service list
/airport-transportation	Airport hub — process, fixed pricing, what is included	Fixed rate card
/jfk-airport-car-service	JFK — terminals, pickup process, rates, FAQ	Pickup and meeting process
/laguardia-airport-car-service	LaGuardia — written separately, never duplicated	Pickup and meeting process
/newark-airport-car-service	Newark — including New Jersey tolls and timing	Pickup process, toll policy
/westchester-airport-car-service	Westchester County (HPN)	Confirm you serve it
/teterboro-airport-car-service	Teterboro — private aviation	Confirm you serve it
/fleet	Every vehicle class with real photographs and capacities	Vehicle list and photography
/corporate-transportation	Accounts, invoicing, service levels, corporate quote form	Invoicing and service level terms
/wedding-transportation	Packages, event transport, event quote form	What each package includes
/service-areas	Boroughs and neighbourhoods actually covered	Areas you genuinely serve
/about	Who the company is, in plain language	Company background

URL	PURPOSE	WAITING ON YOU FOR
/reviews	Genuine Google reviews, with a link to leave one	Google Business Profile access
/faq	Real answers to the questions customers actually ask	Answers to the listed questions
/contact	Phone, email, hours, service area, map, contact form	Contact details and hours
/book	Full booking form	—
/quote	Quote request form	—
/thank-you	Confirmation after a request, with a call option	—
/track	Ride tracking	—
/privacy & /terms	Legal pages matching how the site actually operates	Cancellation and data policies
/admin	Private dashboard for bookings and quotes	Who needs access

Booking and quote system

This is the part of the site that earns its keep. A request submitted by a customer travels straight to your inbox and into the dashboard.

What the customer fills in

Pickup and drop-off with address autocomplete, date, time, passengers, bags, vehicle class, service type, name, phone, email, and special instructions. Airport bookings add airline, flight number, and arrival or departure.

What happens next

The customer sees a confirmation page and receives a confirmation email. You receive an immediate notification with every detail. The request appears in the dashboard marked *New*.

Managing requests

The dashboard lists bookings and quotes with pickup, destination, date, vehicle and customer contact details. Each moves through New, Confirmed, Completed, Cancelled or Pending.

ON EMAIL DELIVERY

Booking confirmations are sent through a dedicated delivery service rather than the mailbox, so they reliably reach the inbox instead of the spam folder. A missed confirmation is a lost booking. Your mailbox stays for human correspondence.

Search and local presence

- A unique page title and description for every page — no duplicated titles
- Clean URLs such as /jfk-airport-car-service, with one clear heading per page
- Structured data describing the business, its service area and its services, validated before launch
- XML sitemap and robots file, submitted to Google Search Console
- Website details kept identical to the Google Business Profile — name, phone, hours, services
- Genuine local content about the areas you actually serve, written naturally rather than stuffed with keywords

No agency can guarantee a number one ranking, and we will not claim one. What we can guarantee is a fast, correctly structured, genuinely useful site — which is what local ranking is built on.

Deployment and running the site

AREA	APPROACH
Code	Private Git repository; every change reviewed before it reaches the live site
Environments	A staging site for review, and the live site — changes are approved on staging first
Releases	Automated: approved changes build and deploy without downtime
Security	HTTPS everywhere, firewall, no password logins to the server, automatic security updates
Backups	Nightly database and file backups stored off the server, with restores tested
Monitoring	Alerts if the site goes down or an error affects a customer
Data protection	Only information needed to fulfil a booking is collected; access is restricted

Pre-launch checklist

Works everywhere

- ☐ iPhone, Android, tablet, desktop
- ☐ Booking and quote forms submit correctly
- ☐ Call and text buttons dial and message
- ☐ Navigation and every link works
- ☐ Fleet photos and maps load

Correct and honest

- ☐ No placeholder or fake information anywhere
- ☐ Only genuine reviews displayed
- ☐ Every advertised service is actually offered
- ☐ Prices accurate and clearly explained
- ☐ Proofread — no spelling errors

Found and measured

- ☐ Page titles and descriptions unique
- ☐ Images have descriptive alt text
- ☐ Sitemap and robots file correct
- ☐ Search Console and Analytics connected
- ☐ Call, booking and quote conversions tracked

Safe and fast

- ☐ HTTPS across the whole site
- ☐ Forms protected against spam
- ☐ Loads quickly on mobile data
- ☐ Readable text and keyboard-friendly navigation
- ☐ Privacy Policy and Terms published

ONGOING

After launch

ITEM	FREQUENCY	ANNUAL
Server, domain, mailbox	Recurring	\$320–680
Security updates and backup checks	Monthly	By agreement
Content updates — rates, fleet, areas	As needed	By agreement
Search performance review	Quarterly	By agreement

Maps and email costs scale with traffic. At the volume expected for a business of this size, both should remain within their free allowances; we will monitor and flag it well before that changes.

Assumptions and exclusions

- **No online payment.** Customers request a booking; you confirm and collect payment as you do today. Card payment can be added later as a separate piece of work.
- **No live GPS vehicle tracking.** The tracking page shows booking status. Real-time vehicle positions require hardware or a dispatch system integration.
- **No dispatch software integration** unless you tell us which system you use.
- **Copy is drafted by us and approved by you.** Facts about the business must come from you.
- **Photography is commissioned by you.** We will provide a shot list and direction.
- **Accounts are owned by you.** Domain, server, Google and email accounts stay in your name, so you retain control of the business's assets.

Estimates are indicative and should be confirmed against current provider pricing at the time of purchase. Please return the items under "What we need from you" so the remaining pages can be built against real information.
